

Smart-Jet

INKS

Get Smart. Get Reliable. Get Printing.

▶ Smart Printers Deserve a Smart Ink.

MSSC Smart-Jet inks are designed to produce reliable and consistent printing results in coding applications. For use in all Smart-Jet and Smart-Jet Plus thermal inkjet printers, these inks set the standard for quality and performance in the industry.

Smart-Jet Inks feature:

- Porous and non-porous options
- Suitable for various materials
- 3 color choices for non-porous printing
- Uses HP 2.5 cartridge technology

Solvent (Non-Porous)

Dye-based solvent inks for non-porous surfaces offer immediate startup, excellent sharpness and fast drying time on most non-porous surfaces.

Aqueous (Porous)

Dye-based aqueous inks for porous surfaces provide immediate startup, excellent sharpness and optical density.
